

Guide to *Aristolochia* species of Sabah

Aristolochia foveolata

Aristolochia nr *foveolata*
(underside)

A. nr foveolata
(old leathery leaf)

Aristolochia nr *foveolata*
(underside)

Aristolochia nr *foveolata*

Aristolochia nr *foveolata*
(underside)

Aristolochia nr *foveolata*

Aristolochia nr *foveolata*
(underside)

Aristolochia nr *foveolata*

These plants are all *Aristolochia* nr *foveolata*, or possibly a complex of very similar species. Since the food plant of *T. andromache* is not yet confirmed, and the *Aristolochia* species are hard to distinguish, we are interested in photos of any plants that look like these.

*Aristolochia acuminata**

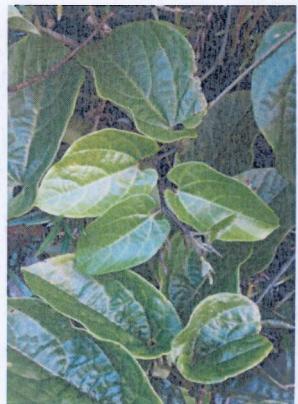

Aristolochia nr *acuminata*
(underside)

Aristolochia acuminata

Aristolochia acuminata
(underside)

Aristolochia acuminata

*Note that *A. acuminata* is the same species as *A. tagala*.
